### Professional Summary

I am a passionate software developer with over 2 years of experience in building mobile apps, dynamic websites, and deploying scalable solutions. My expertise spans frontend and backend development, team management, and project planning. With a strong foundation in computer science, I am dedicated to creating seamless user experiences and efficient, robust systems. I thrive in collaborative environments and enjoy learning new technologies to enhance my skill set.

### Technical Skills

#### *Frontend Development*

- **Proficient:** HTML, CSS, Dart, JavaScript, Flutter
- **Familiar:** React, Next.js, TypeScript

#### *Backend Development*

- **Proficient:** Node.js, Express.js, MongoDB, Git
- **Familiar:** Redis

#### *DevOps & Tools*

- **Proficient:** GitHub, Postman, AWS, Apple Console, Play Console
- **Familiar:** Firebase, Supabase, Figma

### Education

#### **Southern New Hampshire University**

*Bachelor's in Computer Science (2 years)*

#### **OCAD University, Canada**

*Computer Science Studies (2 years)*

## **Professional Experience**

### ***Software Developer***

#### *Self-Driven Projects*

- Designed and deployed dynamic, scalable mobile and web applications.
- Implemented features with an emphasis on performance optimization and user experience.
- Collaborated with diverse teams to plan and execute project roadmaps.
- Adept at debugging, code reviews, and managing version control using Git.

## **Notable Projects**

### ***Explore Bless***

*Mobile App* | [Play Store](#) | [App Store](#)

- Created a feature-rich mobile app for exploring local experiences and events.

### ***Car Hub***

*Web App* | [GitHub Repository](#) | [Live Demo](#)

- Developed a car cataloguing web application to browse and search vehicles dynamically.

### ***FindMyMeals***

*Web App* | [GitHub Repository](#) | [Live Demo](#)

- Designed a responsive web app to search and explore recipes.

### ***Minaara***

*Mobile App* | [Play Store](#)

- Built and published a mobile app tailored to educational services.

## ***Job Finder***

Web App | [GitHub Repository](#)

- Designed an application to streamline job searches with a user-friendly interface.

## **Key Strengths**

- Solid understanding of software development lifecycle and project management.
- Strong problem-solving and debugging skills with a detail-oriented approach.
- Ability to work collaboratively in diverse, cross-functional teams.
